

Again something similar to Adriatic storm cases, but not that intensive.
 Start of the model 21st of April 2003 00 UTC. On figures bellow 27 forecast and verification of MSL Pressure with SINOP data are shown.
 MSL Pressure from ALADIN/LACE domain.

Model version AL25T1_op2.

Comparison of direct model output MSL Pressure with the SINOP MSL Pressure for two stations, start of the model 21st of April 2003 00 UTC.

More data are needed for this case, some barograph data will be very useful.
